WHAT IS INFINITY?

The Infinity™ system is an all-new, two-part cleaning process that delivers an unsurpassed level of cleaning power and show. Designed for all types of washes - tunnels, automatics, and self-serve.

CONSISTENCY

This unique, automated system easily and completely mixes the 100% active alkaline powder base. This creates consistent cleaning power throughout the entire Infinity™ Blend Center. The alkaline base is then automatically mixed with a highly concentrated liquid surfactant formula to create a finished product that is both powerful and reliable.

FLEXIBILITY

Using onsite water allows operators to save on equipment room space as well as shipping costs. Mixing these components on location allows the detergent to be specifically customized to suit the needs of a particular wash. This gives operators infinite product solutions.

SIMPLICITY

It's as easy as pushing a button. No hassle. Less mess.
