KO MANUFACTURING INC.

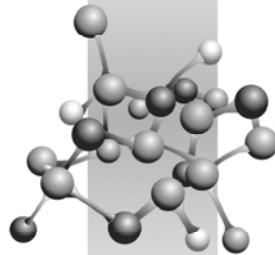

CITRU-SOLVE™

PRODUCT NUMBER 242

RESEARCH

Through R&D and field testing, KO Chemists combine creativity with technology to bring you products with the performance you require. Using our sophisticated KO lab we continually test new products, existing products, and our manufacturing processes for effectiveness and affordability. When a new product meets our requirements, it goes to a select group of end-users for real-world evaluation. Only after testing, evaluating, and re-testing is a KO product ready for distribution. We invite you to come and be a part of a winning solution.

Attention: Refer to our Material Safety Data Sheet regarding hazards, personal protection, and disposal of this product.

Techsheat Modified on 10/27/2004

PRODUCT DESCRIPTION:

Citru-Solve is a water-emulsified citrus solvent. It is designed for cleaning heavily soiled areas, accumulations of grease, heavy soil and road tar. It is also very effective in the removal of asphaltic soils. On road surfacing equipment it penetrates heavy buildups, and promotes water rinsing. The unique blend of surfactants and solvents act to penetrate and remove these tough soils. Most products that remove these types of soils are not biodegradable, but Citru-Solve is made from biodegradable ingredients.

INSTRUCTIONS:

Citru-Solve is formulated to remove road tar from vehicles, tar and asphalt from road surfacing equipment, heavy duty engine degreasing or just general cleaning. Use Citru-Solve full strength or up to 5:1 diluted with water, depending on soil concentrations.

For general purpose cleaning, dilute 2 ounces Citru-Solve for every gallon of water. Rinse or wipe clean.

* Citru-Solve may be incompatible with some painted surfaces. Test on a small inconspicuous area before using on entire surface.

CUSTOMER BENEFITS:

- Biodegradable.
- Excellent wetting and rinsing ability.
- Rapid removal of tar and asphaltic soils.
- Safe to use on most painted surfaces.
