KO MANUFACTURING INC.

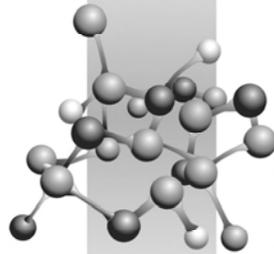

TRAILER BRITE™

PRODUCT NUMBER 435

RESEARCH

Through R&D and field testing, KO Chemists combine creativity with technology to bring you products with the performance you require. Using our sophisticated KO lab we continually test new products, existing products, and our manufacturing processes for effectiveness and affordability. When a new product meets our requirements, it goes to a select group of end-users for real-world evaluation. Only after testing, evaluating, and re-testing is a KO product ready for distribution. We invite you to come and be a part of a winning solution.

Attention: Refer to our Material Safety Data Sheet regarding hazards, personal protection, and disposal of this product.

Techsheat Modified on 10/26/2004

PRODUCT DESCRIPTION:

Trailer Brite is our Drum-in-Box kit designed for heavy duty cleaning of trailers and equipment. The kit is designed to allow the customer to mix their own drums of liquid detergent. The box features two separate containers: a powder portion and a liquid portion which, when water is added, creates the final product. It offers a unique blend of components which penetrate and removes a variety of heavy soils.

INSTRUCTIONS:

To mix kit: Add 10-15 gallons of water to a 55 gallon drum. Mix in the bag of powder and mix well. Fill to 40 gallons with water. Add the liquid and fill to 55 gallons. Mix well. For best results, do not mix less than 55 gallons.

Use directions:

Trailer cleaning: Set metering equipment to deliver 2 to 5 ounces per gallon of water. Steam cleaning: Set metering valve to deliver 5 to 8 ounces per gallon of water. Trailer presoaking: Apply at 10 to 12 ounces per gallon.

CAUTION: Avoid using on painted surfaces and aluminum at heavy concentrations

CUSTOMER BENEFITS:

- Biodegradable.
- Easy shipping and handling.
- High alkalinity for heavy duty soils.
- No streak rinsing.
- Non-toxic.
- Variety of applications
