

PRODUCT PROFILE

MAX-SHINE™

FORMULA 9441

Solvent-Based Tire Dressing

DESCRIPTION

Max-Shine™ is a solvent-based dressing & protectant that creates a beautiful, new-like shine on tires. It spreads evenly on surfaces preventing annoying spotting often associated with inexpensive dressings and penetrates tires deeply for long lasting protection and high shine. This formula is designed for automated applications, but may be sprayed on manually. No wiping is necessary. Unlike many solvent based dressings, Max-Shine™ does not have a harsh offensive smell. Instead customers enjoy a sweet pina colada fragrance.

AT A GLANCE

- > **Beautifies and protects**
