

# DOCKING & STORAGE STATION

AutoShine's **Docking & Storage Station** ensures a safer and more simple way to manage and replenish your carwash's chemicals. The docking port pierces the induction seal on the 2.5 gallon containers, emptying product completely into the 20 gallon holding tank. This process provides an easy and clean way to keep your chemical levels consistently restocked and maintained. The translucent holding tanks allow carwash operators to monitor and control chemical inventories. Each tank only requires just over 1 square foot of floor space. The 2.5 gallon containers are easy to ship, store, and handle. No mixing, no mess. This system reduces waste and risk of injury helping increase profitability.

## 2.5 GALLON CONTAINERS

- Easy to Handle
- Saves Space
- Easy to Ship
- Contains Ultra Concentrated Formulas
- Superior Performance
- Amazing Customer Appeal

## DOCKING PORT SYSTEM

- Delivers Chemical to Container
- Product Empties Completely
- Reduces Waste
- No Mixing
- Mess Free
- Reduces Risk of Injury or Spills

## MODULAR SECONDARY CONTAINER

- 20 Gallon Holding Tanks
- Takes up Less Space
- Easy to View Product Levels
- Requires Just Over 1 sq. ft. of Floor Space Each
- Makes 30 & 55 Gallon Drums Obsolete
- Ideal for all Types of Carwashes
